HOW WILL WE KNOW A COVID-19 VACCINE IS SAFE? VIDEO (48 MINUTES)

Video: <https://childrenshealthdefense.org/protecting-our-future/covid-vaccine-safety-concerns/#video>

Transcript: <https://childrenshealthdefense.org/transcripts/how-will-we-know-that-a-covid-19-vaccine-is-safe/>

Children's Health Defence (CHD) and Liz Mumper a paediatrician, explains why it is important for people to receive all data before making an informed choice on whether to receive the COVID-19 vaccine. The health body, the CDC gives out data on disease prevention yet also provides a lot of money toward vaccines. When the mind is in a fearful state, the ability to process information and think clearly is impaired.

This push for vaccines comes from politics who have conflicts of interest. Doctor Mumper also goes into detail about previous vaccinations including measles when the vaccines were introduced when the death of measles was low.

She goes into how a safe vaccine would be produced,

1) the vaccine would be tested against the true placebo (inert saline).

- 2) a safe vaccine would be tested for a long enough period to properly track adverse events. In addition, post approval surveillance would be conducted to measure long term effects.
- 3) experimental mRNA and DNA gene technologies should undergo years of testing before being used on the public.
- 4) Vaccines should be free of Mercury, aluminium, and nano metals.
- 5) Vaccines should be free of adjuvants proven to be dangerous, including but not limited to squalene, aluminium , and PEG (polyethylene glycol).
- 6) Vaccines should be free of avian, bovine, porcine, monkey, and mouse viruses.
- 7) Vaccines should be free of human DNA and aborted human fetal tissue.
- 8) Vaccines should be free of RFID biochips and nanotechnology agents.
- 9) The liability protection provided to vaccine makers creates perverse incentives to rush the vaccine and ignore safety concerns.

Doctor Thumper looks at the COVID vaccines.

[Candidate 1](#), Moderna therapeutics is in phase 3 trials. It contains an mRNA technology and the adjuvant PEG. Many adverse events were recorded in the first 2 phases.

[Candidate 2](#), Pfizer bioNtech in phase 2/3 trials. It contains mRNA technology and the adjuvant PEG. These vaccine companies are working on four different vaccines. Some were paused because of 'unsatisfactory tolerability' problems.

[Candidate 3](#), AstraZeneca and Oxford in phase 1/2 trials. The trials were suspended temporarily due to two severe adverse effects - one case of transverse myelitis and one case of multiple sclerosis, which was considered coincidental.

[Candidate 4](#), Johnson & Johnson is in phase 1/2 trials, and this vaccine contains genetic splicing of adenovirus with coronavirus spike protein.

[Candidate 5](#), Sanofi and Glaxosmithkline currently in phase 1 trials (soon to enter phase 2 trials), which uses a genetically engineered virus. Also contains adjuvant that contains nano-aluminium.

There are another 8 manufacturers, which have vaccines in the preclinical phases of testing. Four of these eight manufacturers are using mRNA technology.

Other concerns about these COVID-19 vaccines – animals trials were skipped (because of emergency), which is an important stage which can identify adverse events like inflammation. There is also a possibility for 'pathogenic priming' by a vaccine (which was shown in animals during the SARS vaccine trials), also known as 'immune enhancement' or 'antibody-dependent enhancement'. When the vaccinated person is exposed to the same virus, there is a risk of exhibiting an extremely exaggerated and sometimes deadly immune response in him or her.

Nuremberg Code of 1947 states that if an act if for the greater good of society then voluntary consent is essential. Any mandatory, government-imposed measure operates on a presumption of safety, but it is clear at this stage that the COVID vaccines may not be safe. Any Government mandated action must provide a legal remedy for harm or injury, but the PREP act of 2005 prohibits a vaccine injured individual from suing the vaccine manufacturers.

How to develop immune resiliency. Get optimum vitamin D levels, generous vitamin C, and zinc and selenium. Omega 3 essential fatty acids and bioflavonoids like curcumin are also recommended. Avoid pro-inflammatory foods like sugar and processed foods. Spend time in nature. Have supportive relationships. Manage stress as best as you can. 18 billion dollars spent on COVID vaccines thus far.

[Vaccine Trials Film | The Mirror Project \(mp-22.com\)](#)

Part 1 (8:28)

Why were we told that we needed a vaccine? To reduce the transmission of Covid-19 and the severity of illness, while also reducing overwhelm upon the National Health Service (NHS). This is the official story. Robert F Kennedy mentions that the gold standard for getting approval for medical standard products is through double blind placebo-controlled trials.

During phase three of trials, some of the vaccine participants get an injection containing the vaccine candidate, while the other receive an injection of an inert placebo. Neither the person receiving the shot, nor the person administering the vaccine knows what is inside the shot. Studies like this are called double blind placebo-controlled trials.

Event driver trials takes place only when there are enough Covid infection cases. The Pfizer and Moderna trials do not provide adequate assurance that they will protect from serious illness. The symptomatic case hospitalisation ratio by the CDC overall was 3.4 percent, with 1.7 percent in those aged 0-45 years old, 4.5 percent in those aged 50-64, and 7.4 percent in those aged 65+. The trials are practically testing to prevent common cold symptoms. The third issue is the PCR tests, which is what these events and cases were identified by in the trials.

Connecticut pathologist Dr Sin Hang Lee has petitioned the US Food and Drug Administration to require accurate counts of Covid-19 cases in the Pfizer BioNtech Covid mRNA vaccine trial. False positives can result from the use of PCR testing. Following Dr Lee's petition, the World Health Organisation then came forward to state that there needed to be a reduction in the amplification cycle due to the large number of false positives. The trials were based on **only 170 cases**, which were based on the unreliable PCR tests. The trials also showed that the vaccines did not interrupt transmission of the virus.

Part 2 (7:29)

Discussing the negative side effects of the mRNA vaccine. The Mirror Project were contacted by a whistleblower who was part of the major trials. They wanted to speak about medical negligence and foul play. They worked with this person for three months, but then just before the film was due to be released, there was an increase in threats and the whistle-blower asked them not to publish it. The information given in this video was taken from phase three of one of the major vaccine manufacturer trials for the Covid-19 vaccine. They had experienced serious side effects after taking the second dose, which rendered them sick in the intensive care unit. Instead of this case being investigated and studied, they were ignored and discouraged from investigating, despite their continued illness. The rest of the testimony could not be shared in the video, but instead shows the tyranny of the corporations who mask and censor truth to push their agendas.

This video then looks at the side effects that have been reported. Over 48 million in the US had received one or both doses of a Covid vaccine. So far, only the Pfizer and Modern vaccines have been granted emergency use authorization by the FDA. They are still considered experimental until fully licenced.

As of Feb 24th, 929 deaths, a subset of 16,297 total adverse events had been reported to the CDC, Vaccine Adverse Events Reporting System (VAERS) following Covid-19 vaccinations. It is the Medicines and Healthcare Regulatory Authority (MHRA) in the United Kingdom, England. In rare cases, some vaccine participants experienced Immune thrombocytopenic purpura (ITP), which reduces the number of platelets in the blood.

The trials were not picking up any serious injuries, which should show if there are enough participants during the trials, and autoimmune diseases which can result from vaccination may take months or even years to display. A vaccine trial that takes only eight weeks is not going to detect more serious side effects of these vaccinations.

Part 3 (9:19)

Dr Gregory Michaels died of ITP two weeks after receiving the Pfizer vaccine. Many deaths following the Covid-19 vaccines were reported worldwide. Dr Dolores Cahill reports that the vaccinations may

result in Antibody Dependent Enhancement, which results from the mRNA injection, which enhances the disease and causes more harm than good. Health authorities state that the deaths that resulted from the vaccinations were mere 'coincidences', the need for accurate safety data is required.

The four companies who make all of America's mandated vaccines are Nova, Merck, Glaxo and Pfizer are all convicted serial felons, serial criminal enterprises. Since 2009, these four companies have paid almost 35 billion dollars in criminal damages and penalties for defrauding regulators, for falsifying science, for lying to doctors and for killing hundreds of thousands of Americans with products they knew were lethal.

The mass promotion of the vaccines across the world makes it seem that the only intervention to reduce the influenza like symptoms in Covid-19 is vaccination when many people came out in early January 2020 to say that an effective way to treat it is with Vitamin C, D and Zinc, and there are over twenty approved treatments including Hydroxychloroquine, Zinc and Ivermectin. In the US and the UK, vaccine manufacturers enjoy public indemnity against vaccine injuries. Under the Vaccine Act 1986 in the US, the vaccine makers for mandated vaccines have no liability for injuring people so you cannot sue them for vaccine injury. The new Covid vaccines have an even greater level of protection as 'pandemic countermeasures' under the prep act, under the cares act, they have blanket immunity and you cannot sue them. **There is no incentive for them to make a safe product** – Robert F Kennedy.

Part 4 (7:57)

Emergency use authorization is a mass population scientific experiment. It should require extreme scrutiny from the press and the public, but that right has been taken away from the people. In order to continue the vaccine promotion campaign, they had to use censorship to silence any opposition. Government, bigtech, and the pharmaceutical companies and its captive regulators use the term vaccine misinformation. Censorship is the beginning of tyranny. They punish anyone who dares to ask any questions, or even sharing their negative experiences. Censorship does not change minds, it never has. Instead, the doubts are often redoubled. Once you start censoring, fining, arresting, people start to question your intentions. When science itself is politicised, it is hardly surprising that people have concerns about a new vaccine. The final step is restricting those who do not wish to take it, for whatever reasons, and incentivising those who do take it. It will start with businesses, airlines, sporting events, and concerts.

Overall, this will create more and more division in society. Prof Dolores Cahill says that essentially everyone in the world has developed an immune protection against coronaviruses because four years out of ten we come across coronaviruses and most people in the world are naturally immune. Covid-19 is nowhere near the top list of killers to be warranted such a disproportionate response.

If all of these efforts were purely for the good of humanity, why are the private pharmaceutical companies allowed to profit from it?

So, all regulatory industries end up getting captured that they become sock puppets for the regulator industry, but vaccines and pharmaceutical companies there's an extra ingredient there, which is the agencies themselves are helping to develop the vaccines. In the 40 years of research into this area, there was zero mRNA injection or vaccines licenced for use in the world, and this was because even though they had initial trials, the adverse events and deaths associated with these mRNA injections or vaccines were so severe and caused so much harm that had not previously been licenced for use. mRNA vaccines have never been tested on humans before, and with a high survival rate of Covid-19 and a low rate of severe illness, it seems illogical to want to risk taking new untested technology that was rushed through questionable trials. If this vaccine has not been proven to reduce severe illness or stop transmission of the virus then can we even still call it a vaccine?

THE NUREMBERG CODE

Video: <https://youtu.be/DEHINHiEYes> (28 minutes)

The COVID-19 vaccinations are unlicensed products, which make them experimental in nature. The manufacturers of these 'vaccinations' have been given full immunity from the Governments from any vaccine adverse effects or death. Some employers are coercing their employees into taking the vaccine, but the Nuremberg Code states that it is illegal for anyone to be forced to take part in any experiment without his or her full consent, and if an employer is telling you 'no job no job' then this is wrong. A good video alerting people to their rights under the current laws in place.

THE COVID VACCINES PART 1 – Dr Sherri Tenpenny

Article: <https://vaxxter.com/the-covid-vaccines-part-1/>

Dr Tenpenny goes into the ingredients of each of the COVID-19 vaccines. She first explains that the vaccines have only received emergency authorisation, because of the pandemic, but these vaccines have never before been used on humans. Therefore, these vaccines are unlicensed and could never be used were it not for the disclosure that we are in a pandemic. The Pfizer vaccine is an mRNA vaccine that is technically gene therapy as it produces a protein that can alter DNA. She provides full ingredients for the Pfizer / BioNtech vaccine.

The Moderna vaccine is also mRNA, which also contains an unapproved vaccine adjuvant, flagellin, which stimulates a pro-inflammatory response. Another ingredient is tromethamine, which is a prescription medicine to treat metabolic acidosis. The mRNA technology has been coded to transcribe a protein, flagellin, which is used to enhance the cytokine response of the macrophages. Dr Tenpenny provides the full ingredients.

The AstraZeneca vaccine is made from a weakened version of a common cold virus, but its ingredients include a genetically modified human embryonic kidney 293 cell. In May 2020, it was reported that all of the vaccinated monkeys treated with the Oxford AstraZeneca vaccine became infected when challenged. Full ingredients are provided in this article.

THE COVID VACCINES PART 2 – Dr Sherri Tenpenny

Article: <https://vaxxter.com/covid-vaccines-part-2/>

In this article, Dr Tenpenny goes into how the vaccine induced spike antibodies affect the lungs. The instructions within the mRNA vaccines build the spike proteins that are identified on the surface of the SARS-CoV-2 virus, which leads to the production of the spike (S) protein, the protein which plays a vital role in its infectivity. A study on monkeys showed that, although there was a high antibody response to the spike protein, it caused a serious antibody enhanced injury within their lungs. The lungs were weakened and inactivated and contained larger quantities of macrophages, which is within the natural immune response to engulf, digest, and eliminate microbes and foreign proteins through a process called phagocytosis.

There are two primary types of macrophages – 1) M1 cells kill pathogens by secreting pro-inflammatory mediators 2) M2 cells have an anti-inflammatory function and regulate wound healing. The antibodies formed against SARS-CoV-2 spike protein bound to the surface of M2 macrophages and weakened their function, allowing the M1 cells to release unchecked quantities of cytokines. Instead of healing and repairing the infected lung tissue, the antibodies stifled the M2 cells and promoted M1 caused inflammation. These are disastrous results.

Thousands of vaccine adverse side effects are being reported on VAERS in America and the Yellow Card Scheme within the UK, and yet these are not being reported by the mainstream media or Governments.

[Bombshell: Moderna Chief Medical Officer Admits mRNA Alters DNA - DC Dirty Laundry Study 2017: Preclinical and Clinical Demonstration of Immunogenicity by mRNA Vaccines against H1ON8 and H7N9 Influenza Viruses \(researchgate.net\)](#)

Tal Zaks calls it "hacking the software of life". In the first minute of the video Zaks states, "we've been living this phenomenal digital scientific revolution, and I'm here today to tell you, that **we are actually hacking the software of life**, and that it's changing the way we think about prevention and

treatment of disease.” [Emphasis mine.] He even repeats that they (Moderna) think of it like an operating system, which the Moderna website indicates as “Our Operating System”.

The biology of the human body.

1. Our body is made out of organs.
2. Our organs are made out of cells.
3. In every cell there is this thing called messenger RNA or mRNA, for short that transmits the critical information from the DNA (our gene) to the protein, which is really all the stuff we are made out of. This is the critical information that determines what a cell will actually do.

He thinks of it as an operating system, and it's not just found in every cell of our body but in cell of every organism that is alive. If you could change that, if you could introduce a line of code, or change a line of code, it turns out that has profound implications for everything – from the flu to cancer. He calls it information therapy.

BOWLING FOR PFIZER: WHO'S BEHIND THE BIONTECH VACCINE?

Article: <https://architectsforsocialhousing.co.uk/2020/12/09/bowling-for-pfizer-whos-behind-the-biontech-vaccine/>

This well-researched article goes into how Pfizer brought its efficacy success rates for its mRNA vaccine, even though it was based on so few numbers, and with the help of the mainstream media, they sold the UK Government into approving it for its emergency use.

Pfizer has a track record in fraud and corruption, paying out billions in damages, and yet the UK population are told to take a never-before-used-on-humans mRNA vaccine after only seven months of testing because the mass collaboration between politicians, mainstream medias, health authorities, big tech etc, and celebrities tells them that it's safe and reduces virus transmission. There is no evidence to back this up. Then there is a push toward taking this vaccine to return to normal, but only if enough people take it.

The article also goes into the mass fraud of the RT-PCR testing, which is not a reliable tool for detecting infection, and the high amplification cycles produces false positives and the adequate numbers to justify the ongoing lockdowns and restrictions. Even the media outlets who question the efficacy of this mRNA vaccine use experts who have conflicts of interest with the Bill and Melinda Gates Foundation. Why is there such a collaboration between politicians, health authorities, big pharma, big tech etc? I would point to the United Nations 2030 Sustainable Development Goals.

<https://sustainabledevelopment.un.org/content/documents/21252030%20Agenda%20for%20Sustainable%20Development%20web.pdf> under the guise of climate change / climate emergency, which is also linked to the UK Government website.

NICOLA SPEAKS TO JOURNALIST BRIAN GERRISH REGARDING HER HUSBAND TONY'S SEVERE REACTION TO THE ASTRAZENECA VACCINE

Video: <https://www.bitchute.com/video/RiHmE-E5eFO/> (30:21)

Nicola gives a very frank description of the rapid deterioration of her husband Tony after receiving his first AstraZeneca vaccine, which caused his legs to deteriorate. Her GP did not take her seriously. He was a healthy 58-year-old with no previous health issues. Nicola and her husband believed the mainstream media's take on the safety of the vaccines during the extensive rollouts. They believed that what the Government told them was the truth about the safety of these vaccines but are since questioning their motives. The Accident and Emergency they visited told him that he was suffering an allergy, but his side effects got worse over the weekend to which he was having to take a lot of pain killers to relieve his agony, to which Nicola took him again to A&E and they discharged him saying he had sciatica.

She called another ambulance on the Monday and provided them with research on transvers myelitis during the Oxford trials. She finally got a consultant to transfer him to the neurology department to investigate transvers myelitis. He has had an MRI scan and a lumbar puncture, and doctors have confirmed his suspected condition is caused through the AstraZeneca vaccine, which is attacking the proteins in his body. The symptoms started on the 14th day after the vaccine, but he was experiencing the mild symptoms that they report on AstraZeneca a day after vaccination. Had Tony been informed of the possible serious vaccine reactions by the health professional, he would never have taken it.

As her husband struggles to breathe and cannot walk, he is isolated without visitors on a neurology ward, with many other vaccine adverse reaction cases. Nicola says people need to be told the harsh reality about the dangerous side effects of vaccines, and asks "Why were we not told?"

COVID-19 RNA BASED VACCINES AND THE RISK OF PRION DISEASE

Study article: <https://scivisionpub.com/pdfs/covid19-rna-based-vaccines-and-the-risk-of-prion-disease-1503.pdf>

Development of new vaccine technology has been plagued with problems in the past. The current RNA based SARS-CoV-2 vaccines were approved in the US using an emergency order without extensive long term safety testing. In this paper the Pfizer COVID-19 vaccine was evaluated for the potential to induce prion-based disease in vaccine recipients.

The RNA sequence of the vaccine as well as the spike protein target interaction were analyzed for the potential to convert intracellular RNA binding proteins TAR DNA binding protein (TDP-43) and Fused in Sarcoma (FUS) into their pathologic prion conformations. The results indicate that the vaccine RNA has specific sequences that may induce TDP-43 and FUS to fold into their pathologic prion conformations. In the current analysis a total of sixteen UG tandem repeats ($\Psi G \Psi G$) were identified and additional UG (ΨG) rich sequences were identified. Two GG Ψ A sequences were found. Potential G Quadruplex sequences are possibly present, but a more sophisticated computer program is needed to verify these. Furthermore, the spike protein, created by the translation of the vaccine RNA, binds angiotensin converting enzyme 2 (ACE2), a zinc containing enzyme. This interaction has the potential to increase intracellular zinc. Zinc ions have been shown to cause the transformation of TDP-43 to its pathologic prion configuration.

The folding of TDP-43 and FUS into their pathologic prion conformations is known to cause ALS, front temporal lobar degeneration, Alzheimer's disease and other neurological degenerative diseases. The enclosed finding as well as additional potential risks leads the author to believe that regulatory approval of the RNA based vaccines for SARS-CoV-2 was premature and that the vaccine may cause much more harm than benefit.

URGENT INFORMATION ON COVID VACCINE – DR CARRIE MADEJ

Video <https://www.bitchute.com/video/OgWkhszRANvh/> (23:30 mins)

Video Transcript: <https://www.covidtruths.co.uk/wp-content/uploads/2020/08/Warning-About-Covid-19-Vaccine-Dr-Carrie-Madej.pdf>

In conclusion, we are entering into uncharted territory that can change what it means to be human. The vaccines for Covid-19 are not safe, by any scientific methodology. They are introducing cancerous and mutagenic cell lines into our bodies and have been for a long time. They are introducing toxins into our bodies. This has been going on for a long time. Introducing different animal genomes into our bodies. This has been going on for a long time. They do not have proof that what they do, what they say they were going to do, will happen. There is absolutely no proof yet. They don't have to have the proof. The recombinant RNA, recombinant DNA technology will cause permanent and unknown genetic changes in a person's body. Once their DNA is changed, he or she will live with that change for the rest of their lives. Also, the ripple effects from that change, who knows what they could be, for the rest of his or her life. There is no going back. It's not like, "oh I got that vaccine it didn't work; I won't do it again." No, its do or die with this. I don't know, and I don't think they or whoever is trying to market this really knows the ultimate outcome. It doesn't sound good.

Essentially, this creates a new species, and perhaps destroys an old one. Us. Us as humans as we know. It is also introducing nanotechnology and its robotic technology into the body. This is all suggesting the ability to use this vaccine and its ancillary products, the things I mentioned just now, some of the names like ID2020 etc, to hook us all up to an artificial intelligence interface. This is not a one-way street, this is two-way street.

I know it is a lot of information to digest, and it scares me. It has scared me for years. I've been to scientific meetings where they have talked about this. I've been to business meetings where they talk about this. This is real it is not fantasy. I've studied this since I was in my early twenties, and it's real. We have to speak up about this now, for us, for our families, for our future generations, for the human race. This is no joke, guys. Please do your own research as much as you can, and start talking and talking, and don't stop the social media. Stay on all of it, and you start flooding the social media with this.

AMERICAN FRONTLINE DOCTORS WHITE PAPER ON EXPERIMENTAL VACCINES FOR COVID-19

34-page PDF: https://www.americasfrontlinedoctors.com/wp-content/uploads/Vaccine-PP.pdf?fbclid=IwAR2vUdfZ9eaxYvQuWEhAIRYEk5XVTwSt5EgiKRo0lvhUVFfm6eXTw_uW48c

Authors : Simone Gold, MD, JD, James Todaro, MD, Lee Merritt, MD, Richard Urso, MD, Robin Armstrong, MD, Scott Barbour, MD, Jeff Barke, MD, Mark McDonald, MD, Teryn Clark, MD, Shelley Cole, MD, Geoff Mitchell, MD, JD.

This document represents the preliminary findings of an investigation conducted by the member-physicians of America's Frontline Doctors. We are recommending caution for patients and policy makers and employers. Additional transparency and more research are needed before we ask Americans to embark on the largest experimental medical program in US history. The unknowns must be addressed through a scientifically rigorous process.

Very informative white paper by the American Frontline doctors, who cover the COVID-19 policy myths, COVID-19 medical myths, COVID-19 experimental vaccines trials, COVID-19 experimental vaccines controversies (including the use of brand new technology, failure of previous coronavirus vaccines, no animal studies, known and unknown complications, no proof that the vaccine stops virus transmission etc), experimental COVID-19 vaccines, COVID-19 experimental vaccines and antibody enhancement, COVID-19 experimental vaccines and other known problems, COVID-19 experimental vaccines and other unknown to new problems, pharmaceutical companies conflict of interests, experimental vaccines and legal issues for patients, COVID-19 experimental vaccines and unusual processes, American Frontline Doctors recommendations regarding experimental COVID-19 vaccines, and a call to action.

THE DANGERS OF THE MRNA INJECTION, JAMES DELINGPOLE INTERVIEWS DR MIKE YEADON

Video: <https://www.bitchute.com/video/N4QM6ccE8RBY/> (65:57)

Dr Mike Yeadon, former Chief Scientific Officer and Vice President of Pfizer talks about the gene therapy injections and thrombocytopenia, which is a condition where blood platelets, thrombocytes, are abnormally low, and this can lead to an increase in bleeding in any area of the body. At 17:45, Dr Yeadon says, I think I've identified the mechanism The spike protein that all the gene-based vaccines express is not some passive anchor or hook. The damn thing is biologically active. It's a fusogenic protein; it makes cells stick together. Inconveniently, it's capable of initiating blood coagulation and activating the immune complement pathway. Dr Yeadon is an expert in the field of immunology. Having an experimental vaccination is like playing Russian roulette. Around 45 minutes into the interview, a public health vaccination needs to be effectively without side effects, because the risk to

public health is far more dangerous and could cause sickness and possible death that would not otherwise have occurred without the vaccination.

Doctors who explain clearly why vaccines aren't safe or effective. 🧨🧨👉
